MAY 19 2005

OFFICE OF
WATER

The Honorable Don Young
Chairman, Committee on Transportation
and Infrastructure
U.S. House of Representatives
Washington, DC 20515

Dear Chairman Young:

This is regarding the November 2003 Draft Blending Policy which addresses the management of peak wet weather flows at municipal wastewater treatment facilities. The draft policy received extensive public comment and has been the subject of considerable on-going discussion and debate, including being the focus of a recent Hearing before the House Subcommittee on Water Resources and Environment.

Based on our review of all of the information received, we have no intention of finalizing the blending policy as proposed in November 2003. We continue to review policy and regulatory options to manage this issue and look forward to working with Congress, communities and citizens on effective and efficient approaches that protect communities and ensure compliance with the Clean Water Act.

Sincerely,

A handwritten signature in black ink, appearing to read "B. H. Grumbles".

Benjamin H. Grumbles
Assistant Administrator
